Your Health Companion For Life

**Fasting and Non-Fasting Options Available*

Getting Ready for Your Screening

Before Your Screening

For Fasting
Option

- Prior fasting of at least 8-10 hours to your appointment is required. Only consumption of plain water is allowed.
- Routine medication for heart conditions/high blood pressure can be consumed.
- For diabetic patients, please refrain from taking your diabetic medication on the morning of your appointment.
- For ladies: Pap smear, urine and stool tests should be done at least 5 days before or after your menstruation cycle.

For Non-Fasting
Option

- Please note that these packages use the result of Direct LDL vs the usual Cholesterol LDL which may produce raised values and sometimes be attributed to food and drink consumption within a few hours before the screening.
- This may require a repeat test of fasting lipid profile to get a more accurate representation of your health condition.
- Non-Fasting option is however not suitable for individuals with anemia.
- For individuals who are considering abdominal ultrasound tests, fasting is still required.

On the Day of Your Screening

- Bring along your identification document (NRIC/Work Pass Card /Passport).
- Schedule an appointment for a post-review with your doctor after completing your screening.

After Your Health Screening

- Your report will be ready within 5 - 7 working days.
- Post-review (In-clinic/ Teleconsultation): Our Doctor can discuss your report and provide recommendations as necessary.

ACTIVE

\$47

(\$43.12 W/O GST)

Physical Examination

- Height & Weight
- Blood Pressure
- Vision
