COVID-19 Services

About Us

AcuMed is a private healthcare provider with 12 clinics in Singapore.

We have grown over the years since 1973 in terms of network and services to better care for our patients. We currently provide a wide range of medical services to more than 1,000 corporate clients and for generations of patients.

Our Approach - To provide **holistic, quality and affordable care** to our patients, clients, team members and the community

During this **COVID-19 pandemic**, we see the evolving need to bring new levels of comprehensive care to our patients.

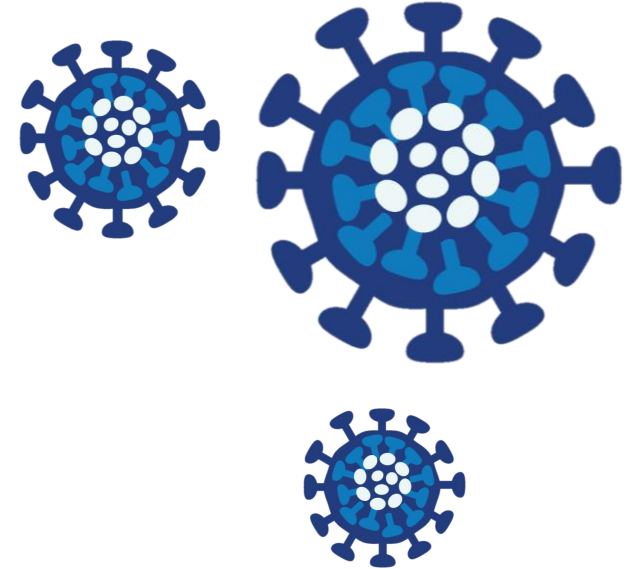

With bilateral travel corridors from selected countries potentially being arranged from the second half of the year, AcuMed wish to **support you** in your business activities by ensuring that the healthcare needs of your clients and colleagues are met.

COVID-19 Services

Here is our range of **COVID-19 and travel-related services:**

- ✓ Polymerase Chain Reaction (PCR), Antigen Rapid Testing (ART), and serology testing (IgG/IgM).
- ✓ Range of travel vaccines (E.g., Flu and Hepatitis A and B)
- ✓ Onsite Medical Posts (ad hoc, short, medium, and long term) to conduct Covid-19 testing, screenings, or medical consultations.
- ✓ Pre-Event Testing be it at AcuMed clinics or onsite
- ✓ Assistance and advisory services relating to licensing applications and location set up for onsite medical posts.
- ✓ Onsite N95 Mask Fit Testing to identify the right model, style, and size N95 mask for each staff.
- ✓ COVID-19 advisory services regarding safe-management measures and incorporation of good-practices to ensure safe-resumption of mass events/business activities.
- ✓ Liaison with relevant government agencies to ensure compliance with regulatory and licensing requirements.

COVID-19 Testing

Polymerase Chain Reaction (PCR) Test

- Polymerase Chain Reaction (PCR) swab tests detect the presence of the Covid-19 Antigen directly.
- Gold Standard for testing for Covid-19 at present.
- The sample is obtained via the Nasopharyngeal route.
- 24 – 36 hours TAT
- Price from \$157 before GST

Serology Test

- This tests for the presence of antibodies (IgM/IgG) that are produced by the body in response to an infection by the Covid-19 virus.
- Serology tests alone cannot be used to accurately diagnose Covid-19 infection.
- Currently a Pre-Departure Test (PDT) requirement for countries such as China.
- Price from \$45 before GST (IgM)

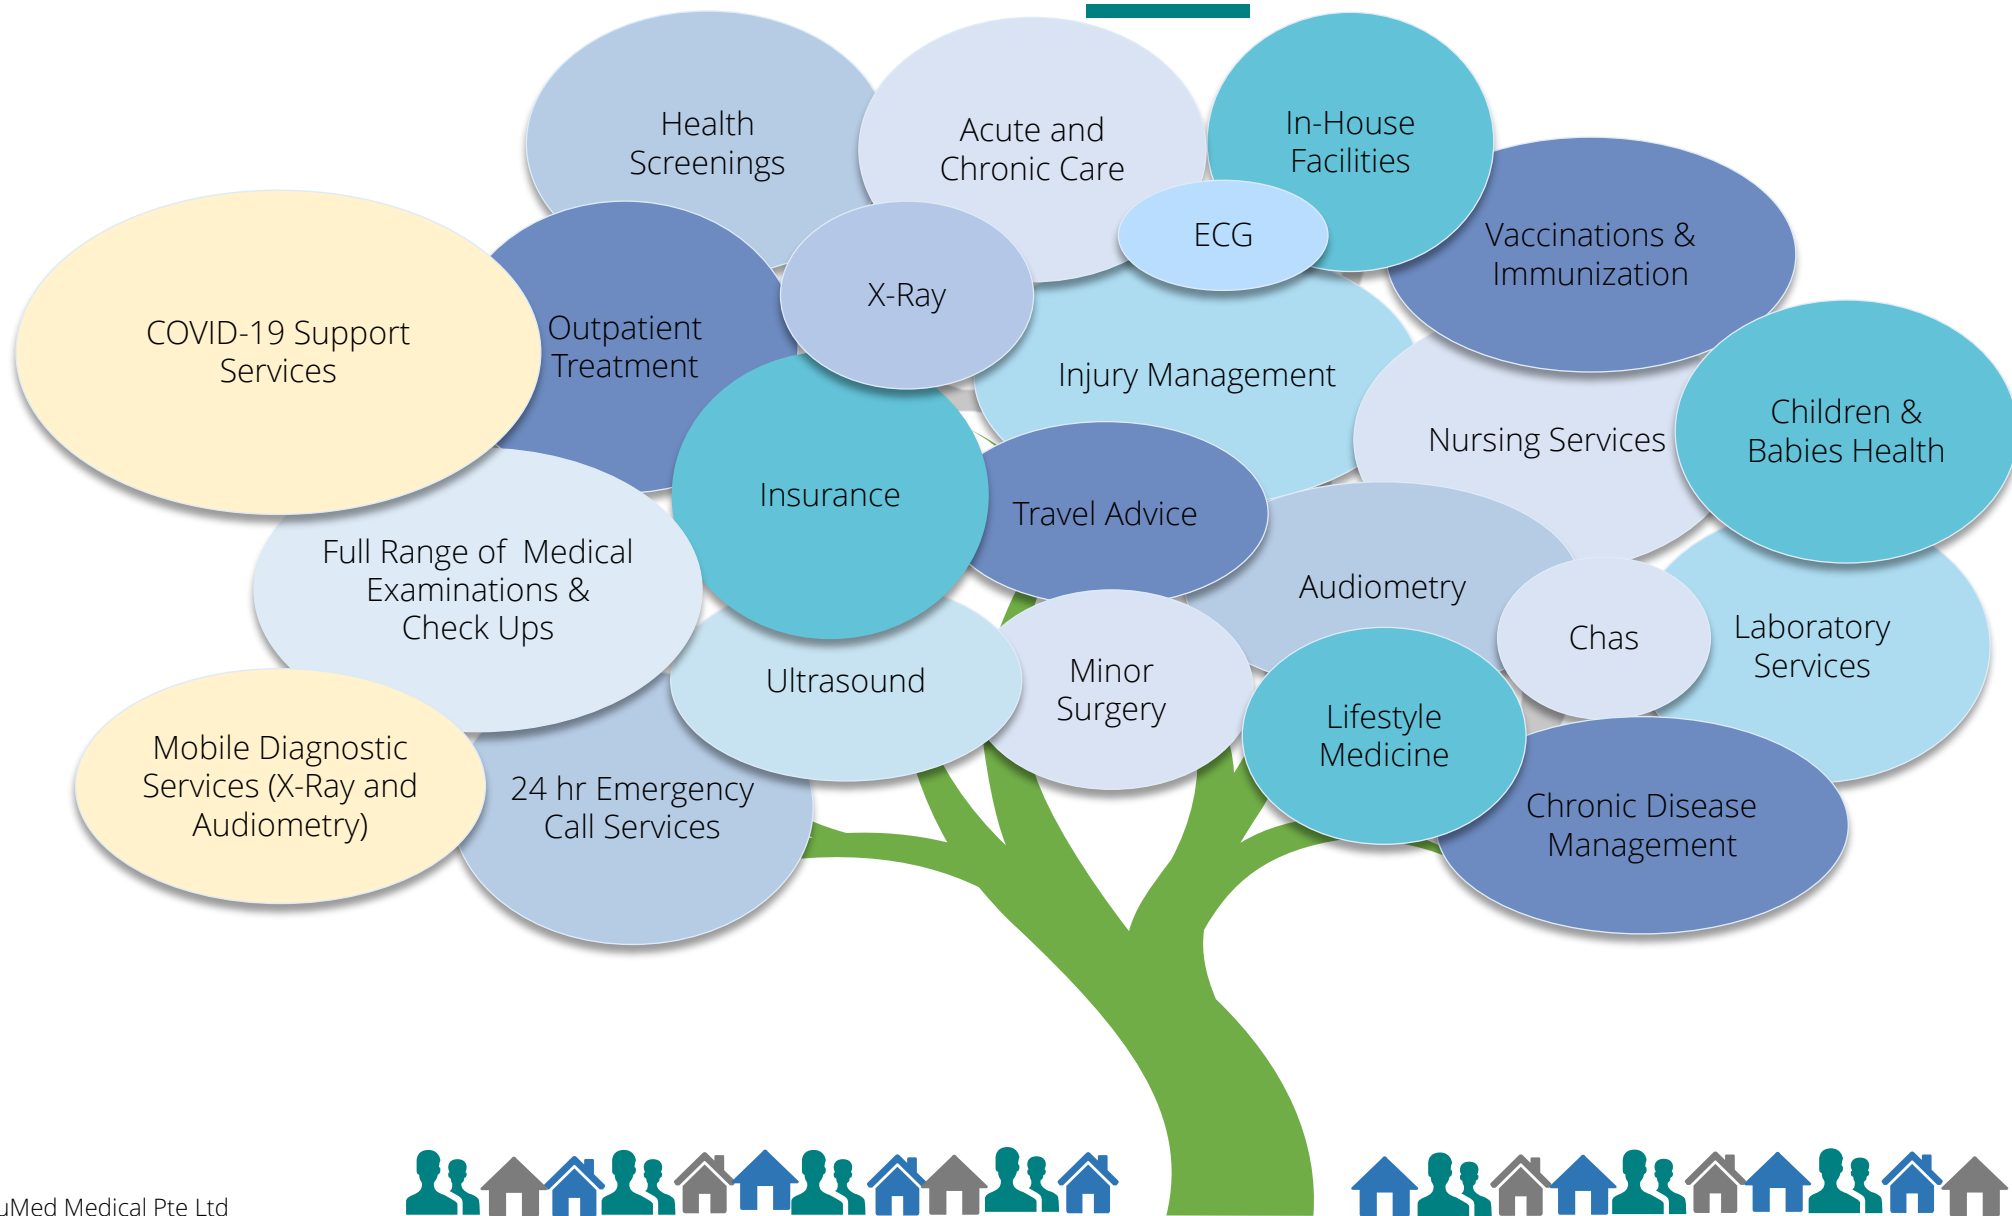

Antigen Rapid Testing (ART)

- This is usually used in pre-event testing.
- The sample is obtained via the Nasopharyngeal/ Nasal route.
- Test results ready within 30 minutes.
- Price from \$46 before GST
